

> **BMW factory, Leipzig**

KAEFER Construction GmbH, Berlin

Summary	Delivery and assembly of KAEMOBIL walls in production areas
Location	BMW AG, Werk Leipzig, BMW Allee 1, 04349 Leipzig
Build time	July 2003 to October 2004
Client	BMW AG, Petuelring 130, 80788 München
Architect	Kohlbecker Architekten und Ingenieure, Hildastraße 20, 76571 Gaggenau
KAEFER's role	Up to 12 m high and partially free-standing KAEMOBIL walls, which lined up end to end would stretch for 8 km. Execution: partially self-supporting F30 walls in 14 different colours (powder-coated) including doors and windows.
Challenge	To assemble the self-supporting F30 cabins with lengths of up to 30 m.
Our solution	KAEMOBIL System – developed KAEMOBIL walls in metal especially for BMW
Added value for client	KAEMOBIL System installed throughout the factory, which meets all fire and noise protection specifications, is resilient and can be easily extended and altered.
