

**> Airbus Maintenance Training Centre, Hamburg Finkenwerder**

KAEFER Construction GmbH, Hamburg

Summary	New building of Airbus Maintenance Training Centre
Location	Airbus Maintenance Training Center, Hein-Saß-Weg 31, 21129 Hamburg-Finkenwerder
Build time	August 2003 to March 2004
Client	Airbus Deutschland GmbH, Kreetslag 10, 21129 Hamburg-Finkenwerder
Architect	Planungsgemeinschaft Krebs Architekten BDA/Laborie Architectes (France), Nordallee 39, 85356 München-Flughafen
KAEFER's role	Delivery and assembly of KAEMOBIL walls in F90 standard, wall and ceiling panelling including suspended, curved aluminium panelled ceilings
Challenge	Planning and executing the curved aluminium panelled ceiling. The curvature of the ceiling extends over the whole length of the building, and an interior atrium with increments specially requested by the architect also had to be integrated.
Our solution	Close cooperation with the architect, careful planning and execution as well as contributing our own ideas and solutions thanks to long experience of fitting high-quality metal ceilings.
Added value for client	One contact for planning and execution of the entire outfitting and for detailed coordination with the architect.
