

**> Passageway between Terminals 1 and 2, Frankfurt Airport**

KAEFER Construction GmbH, Frankfurt

<b>Summary</b>	Link between Terminal 1 (Hall C) and Terminal 2, passenger transfer
<b>Location</b>	Frankfurt Airport
<b>Build time</b>	September 2007 to April 2008
<b>Client</b>	Fraport AG, 60547 Frankfurt am Main
<b>Architect</b>	JSK Dipl. Ing. Architekten, Hainer Weg 50, 60599 Frankfurt am Main
<b>KAEFER's role</b>	Screed, flooring, floor coatings, ceilings (e.g. stretched metal ceilings, wet ceilings), windows, doors (e.g. fire-resistant doors and rolling gates), metal construction work, special wall panelling, painting, metalworking, final cleaning.
<b>Challenge</b>	Short construction time, dovetailing of all contract sections within a "ribbon site" (passageway is 370 m long and 20-25 m wide).
<b>Our solution</b>	Detailed preparation, ribbon site divided up into separate sites
<b>Added value for client</b>	Outfitting solutions from a single supplier, vast experience with complex projects, own vehicles, flexibility thanks to in-house prefabrication of fire-protection elements in Frankfurt.
