

**> Axel Springer Verlag, Berlin**

KAEFER Construction GmbH, Hamburg

Summary	Delivery and assembly of dry-built walls and doors in the new head office
Location	Axel Springer AG, Axel-Springer-Straße 65, 10888 Berlin
Build time	February 2002 to April 2004
Client	Axel Springer AG, Axel-Springer-Straße 65, 10888 Berlin
Architect	RHWL Architects, Neue Schönhauser Straße 9, 10178 Berlin
KAEFER's role	Walls (approx. 60,000 sq m), some 3,500 doors and metal ceiling in auditorium.
Challenge	Complicated logistics as site is in the centre of Berlin (Mitte/Kreuzberg). Complex metal ceiling, very high percentage of doors (T0, T30, T90).
Our solution	Smart logistics with just-in-time delivery system. Doors planned and configured with the help of the Competence Centre Doors. A metal ceiling was chosen instead of a plasterboard ceiling, as it is quicker to install and of higher quality.
Added value for client	All deadlines met or better.
